

Utilisez &lt; , &gt; ou = pour comparer les fractions.

**Réponses**

Ex)  $\frac{4}{10} + \frac{9}{10} ? \frac{6}{10}$   
 $\frac{13}{10} > \frac{6}{10}$

1)  $\frac{4}{8} ? \frac{4}{8} - \frac{1}{8}$

Ex.           >          

2)  $\frac{2}{5} + \frac{1}{5} ? \frac{3}{5} + \frac{3}{5}$

3)  $\frac{4}{7} - \frac{1}{7} ? \frac{2}{7} - \frac{1}{7}$

1.                                 

2.                                 

4)  $\frac{1}{6} ? \frac{3}{6} + \frac{2}{6}$

5)  $\frac{8}{9} - \frac{6}{9} ? \frac{7}{9}$

3.                                 

4.                                 

6)  $\frac{2}{5} + \frac{2}{5} ? \frac{2}{5} + \frac{4}{5}$

7)  $\frac{5}{7} - \frac{1}{7} ? \frac{4}{7} - \frac{1}{7}$

5.                                 

6.                                 

8)  $\frac{1}{5} ? \frac{4}{5} + \frac{1}{5}$

9)  $\frac{4}{5} - \frac{1}{5} ? \frac{1}{5}$

7.                                 

8.                                 

9.                                 

10)  $\frac{5}{9} + \frac{3}{9} ? \frac{5}{9} + \frac{4}{9}$

11)  $\frac{5}{6} - \frac{5}{6} ? \frac{4}{6} - \frac{2}{6}$

10.                                 

11.                                 

12.                                 

13.                                 

14.                                 

15.                                 

12)  $\frac{4}{6} ? \frac{2}{6} + \frac{2}{6}$

13)  $\frac{7}{10} ? \frac{7}{10} - \frac{2}{10}$

14)  $\frac{2}{7} + \frac{4}{7} ? \frac{4}{7} + \frac{1}{7}$

15)  $\frac{4}{5} - \frac{2}{5} ? \frac{1}{5} - \frac{1}{5}$

Utilisez < , > ou = pour comparer les fractions.

Ex)  $\frac{4}{10} + \frac{9}{10} ? \frac{6}{10}$   
 $\frac{13}{10} > \frac{6}{10}$

1)  $\frac{4}{8} ? \frac{4}{8} - \frac{1}{8}$   
 $\frac{4}{8} > \frac{3}{8}$

2)  $\frac{2}{5} + \frac{1}{5} ? \frac{3}{5} + \frac{3}{5}$   
 $\frac{3}{5} < \frac{6}{5}$

3)  $\frac{4}{7} - \frac{1}{7} ? \frac{2}{7} - \frac{1}{7}$   
 $\frac{3}{7} > \frac{1}{7}$

4)  $\frac{1}{6} ? \frac{3}{6} + \frac{2}{6}$   
 $\frac{1}{6} < \frac{5}{6}$

5)  $\frac{8}{9} - \frac{6}{9} ? \frac{7}{9}$   
 $\frac{2}{9} < \frac{7}{9}$

6)  $\frac{2}{5} + \frac{2}{5} ? \frac{2}{5} + \frac{4}{5}$   
 $\frac{4}{5} < \frac{6}{5}$

7)  $\frac{5}{7} - \frac{1}{7} ? \frac{4}{7} - \frac{1}{7}$   
 $\frac{4}{7} > \frac{3}{7}$

8)  $\frac{1}{5} ? \frac{4}{5} + \frac{1}{5}$   
 $\frac{1}{5} < \frac{5}{5}$

9)  $\frac{4}{5} - \frac{1}{5} ? \frac{1}{5}$   
 $\frac{3}{5} > \frac{1}{5}$

10)  $\frac{5}{9} + \frac{3}{9} ? \frac{5}{9} + \frac{4}{9}$   
 $\frac{8}{9} < \frac{9}{9}$

11)  $\frac{5}{6} - \frac{5}{6} ? \frac{4}{6} - \frac{2}{6}$   
 $\frac{2}{6} > \frac{0}{6}$

12)  $\frac{4}{6} ? \frac{2}{6} + \frac{2}{6}$   
 $\frac{4}{6} = \frac{4}{6}$

13)  $\frac{7}{10} ? \frac{7}{10} - \frac{2}{10}$   
 $\frac{7}{10} > \frac{5}{10}$

14)  $\frac{2}{7} + \frac{4}{7} ? \frac{4}{7} + \frac{1}{7}$   
 $\frac{6}{7} > \frac{5}{7}$

15)  $\frac{4}{5} - \frac{2}{5} ? \frac{1}{5} - \frac{1}{5}$   
 $\frac{0}{5} < \frac{2}{5}$

## Réponses

Ex.           >          

1.           >          

2.           <          

3.           >          

4.           <          

5.           <          

6.           <          

7.           >          

8.           <          

9.           >          

10.           <          

11.           >          

12.           =          

13.           >          

14.           >          

15.           <
